POOR LIVING CONDITIONS HARM LABOR EFFICIENCY -- Kommunist, No 135, 10 Jun 49

A plenum of the Leningrad City Party Committee was held on 4 June. A. Arutyunyan, secretary of the city committee, spoke on the economic and political tasks of Leningrad Party organizations.

The committee has done good work in increasing the output of city industrial enterprises and in fulfilling the plans of the city's railroad terminal. The city's industry fulfilled its third-year plan ahead of schedule and has exceeded the current 5-month plan.

But these general figures hide some serious shortcomings. Qualitative indexes, particularly in reference to assortment of goods, are very low in a number of enterprises. Labor discipline is on an extremely low level in some enterprises. The turnover of the labor force in the textile combine and the hosiery factories is particularly high. As this is primarily due to poor working and living conditions, primary Party organizations must make an effort to alleviate this situation.
